Re: Wallisville Road  
Houston, Texas

Gentlemen:

This is to acknowledge receipt, on November 11, 1985, of a letter from the Texas Water Commission (TWC), dated October 30.

Olin Corporation's Environmental Affairs Department is currently evaluating the technical feasibility and practicability of undertaking the suggested seven proposals. Our initial reaction is that there are technical problems with some of these suggestions. However, we believe that a meeting, with the same parties involved in our October 15 meeting, would be very helpful in addressing these concerns and reaching a final resolution, to the provisions of the Scope of Work, previously submitted by the private parties involved in this matter.

We, therefore, suggest that the attendees to the October 15 meeting reconvene at the office of the Environmental Protection Agency (EPA) in Dallas sometime during the week of December 2 for the purpose of (a) reaching final agreement on the Scope of Work and (b) agreeing on a date on which the work described in the proposal can begin. To facilitate the holding of this meeting, I think either of your offices should contact the appropriate parties to ascertain the most convenient date.

Please let me know if I can be of any further assistance regarding this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Allyn Myles Carnam". The signature is fluid and cursive, with a large loop at the end.

Allyn Myles Carnam
